

The IHS crane scale offers a strong, safe solution for weighing heavy, suspended loads in industrial shipping and production operations. Ruggedly constructed, IHS features robust metal die-cast housing, a rotating plated steel hook and sturdy, oversized shackle. A remote control is included to allow scale operation from a safe distance. Readings are shown on a bright-red LED display, making them visible in any lighting conditions. The hold function retains the reading on the display after the weight is removed from the scale, allowing time for the operator to record the value.

## When strength and safety are essential, IHS is the overwhelming winner to weigh suspended loads
